

**Step 1– AMNI SOUL ECO® Technical Certification – submission form– For Seamless/ Hosiery/ Socks/ Fabrics Producer**

EUROPE & ASIA Final Brand Sales

Combine the quality of your products with **AMNI SOUL ECO®** technology developed by Solvay, brings valuable benefits to your customers.

**AMNI SOUL ECO®** certified producers enjoy services as:

- Oeko-tex® certified: no harmful or toxic substances for Human Being;
- **AMNI SOUL ECO®** Communication Support to your customer, the brand: as technical validation of Brand communication,
- for the certified brands: authorization for communicating **AMNI SOUL ECO®** brand, **AMNI SOUL ECO®** hangtags supply, **AMNI SOUL ECO®** banner supply, brands publication on **AMNI SOUL ECO®** website and **AMNI SOUL ECO®** facebook, exhibition of the brands in trade shows, etc.

Become a **AMNI SOUL ECO®** certified player couldn't be easier. Please follow the steps below:

1. Fabric / Seamless / Socks / Hosiery developed with **AMNI SOUL ECO®** Yarns should be submitted for testing using the form on the back of this document to our certification test laboratory (15 days of analysis).
2. We will confirm in writing the results of the certification testing, and if the product meets the Technical Certification Standards detailed below, a unique reference number will be provided with the approval certificate.
3. The Fabric / Seamless / Socks / Hosiery producer can promote to its customers the **AMNI SOUL ECO®** benefits regarding to its product.

The following certification standards apply to all Fabric / Seamless / Socks / Hosiery products that contain **AMNI SOUL ECO®** yarns.

The producer must please advise the Brand (your customer) which will commercialize the product that, to obtain the **AMNI SOUL ECO®** Trademark License Agreement, the final product must meet the **AMNI SOUL ECO®** and biodegradable materials minimum in the total weight composition and the brand must send the communication material and/or packaging to be technically validated by SOLVAY (follow **AMNI SOUL ECO®** Branding Submission Form – For Cut&Sewn Apparel and Brands – Step 2). Also important, the producer must advise the Brand (your customer), there are special regulatory local rules and **AMNI SOUL ECO®** technical team already knows few of them (ex. USA).

All the certification process is free of charge.

SOLVAY has established specific quality standards for **AMNI SOUL ECO®** certification. The testing protocols cover: fabric density and construction, and % of other(s) fiber(s).

Hangtag:	Claims to promote:	Summary of technical certification standards:
	<p>This garment contains <b>AMNI SOUL ECO®</b>, the Polyamide fiber with enhanced biodegradability that decomposes in around 5 years for products disposed of in landfills*.</p> <p>*Reference System: ASTM D5511 - Standard Test Method for the Determination of Anaerobic Biodegradation of Plastics Under High-solids Anaerobic Digestion Conditions</p>	<p>More than 50%* of <b>AMNI SOUL ECO®</b> fiber in the total weight composition, and less than 15% of non-biodegradable material in the total weight composition.</p> <p>*<b>Except for Denim and Spun Yarn.</b> Denim Fabric must contain at least 20% of <b>AMNI SOUL ECO®</b> fiber in the total weight composition and less than 15% of non-biodegradable material. Staple Fiber and Spun yarn produced must contain at least 15% of <b>AMNI SOUL ECO®</b> fiber in the total weight composition and less than 15% of non-biodegradable material.</p>
